

Reception Adeola and Donaldson Classes  
We are learning about ... **Marvellous Maths**

**Must:** I must be able to count and recognise numbers to 5

**Should:** I should be able to recognise the correct amount or find the correct amount for a given number

**Could:** I could say 2 numbers that make another number e.g  $3+2=5$

### Go the extra mile by .....

- \* Cooking/baking, using different scales and measurements to make something yummy
- \* Going on a number hunt, how many numbers can you spot/take photos of?
- \* Making different amounts with items you have at home
- \* Write some number sentences or draw some pictures of number pairs

### Number challenge!

Can you find a book or story with numbers in it to share?

### Vocabulary

maths	count	number
numeral	amount	add
subtract	total	altogether
forwards	backwards	more
less	greater	fewer

### Key Questions

Which group has more/less/most/least?  
Which number comes before/after?  
If I have 3, how many more do you need to make 5?  
Which two numbers make 5?

### What do we need to know about Maths?

Counting 0, 1, 2, 3, 4, 5

The order of the numbers. Which number comes before, which number comes after.

Say which group has more/less, the most/the least, greater/fewer.

Say/choose a number and find the correct amount of objects.

Know that 2 numbers together make another number, at least all numbers to 5, and some up to 10. E.g  $2+3=5$ ,  $4+1=5$ ,  $4+3=7$ ,  $5+5=10$

**Website** – Explore the cbeebies website for lots of numeracy games and activities
