## Should be able to...

- Know and understand the meaning of the vocab words within the 'must' section from our E-Safety lessons over the year.
- Feel confident and know how to report someone or something if you feel threatened or unsafe.
- Understand how to make sure your accounts are private and that your information isn't available to others.
- Know not to share photos of yourself or your location with people you've never met or on public sites.
- Understand that things you say and post online can stay there forever.

## Extra mile work

- Teach a younger sibling or family member (age appropriate) about how to stay safe online and the importance of doing so.
- Create a poster aimed at year 5/6 children about being safe when being on the internet. Consider using the vocab words.
- Produce your own movie all about E-safety, detailing key rules about staying safe whilst using the internet.
- Make three scenarios that each have a different problem that has occurred from not being safe on the internet. How would you resolve each of these scenarios?
